

PI2LM – Introduction To Lean Manufacturing

Are you under pressure to...

- Cut costs?
- Improve productivity?
- Increase throughput?
- Reduce lead times to customers?
- Improve operational efficiencies?
- Improve product quality?
- Increase floor space?
- Buy new machinery to increase capacity?
- Reduce scrap rate?

But don't know how?

If you answered yes to any of the above, then we may have a solution for you.....**Operational Excellence through Lean Manufacturing.**

Lean is a unified, comprehensive set of philosophies, rules, guidelines, tools and techniques for eliminating *muda*, the Japanese word for waste.

The Lean Manufacturing or what is originally known as Toyota Production System (TPS) has been around for a number of years and was developed in Japan by the 3 pioneers, Sakichi Toyoda, Kiichiro Toyoda and Taiichi Ohno and were later adopted by America and Europe. In New Zealand the concepts are relatively new and have been employed by a limited number of organisations and with good success.

- * Introduction to Lean (Competitive) Manufacturing
- * Concept of Value and Waste
- * The Lean Tool Kit
- * Lean Tools and Techniques
- * Lean Metrics
- * Building Lean Culture

*** The workshop will include activities, videos, case studies and discussions.

The workshop offers attendees insight into well recognised, topical and much discussed business process improvement tools which so far have found only little entry into the NZ industry. The workshop will provide simple and practical solutions to improving your company's productivity and bottom line returns.

The workshop's main focus will be on improving labour productivity, which as reported in many places New Zealand relatively is lagging behind most OECD countries.

This workshop will open doors to World-Class Manufacturing and Operational Excellence and the motivated attendees will change your operation for a more competitive future.

The workshop is suitable for Operations/Manufacturing Executives, Manufacturing and Plant Managers, Production Managers, Engineering and Maintenance Managers, Supervisors and Team Leaders

Contact Productivity Institute to book your workshop(s) or for further information
